## Shaping Business Central

Did you know that you can shape the future of Business Central by requesting new features and functionality? Have you ever asked yourself, “Why doesn’t Business Central do this?” or “Why does it do it that way instead of this way?” Sometimes the Microsoft Dynamics team is simply unaware of a particular shortcoming or feature and bringing this to their attention will lead to a positive outcome. For this reason Microsoft launched its Dynamics Ideas site.

The ability to shape future Microsoft products extends beyond Business Central and covers a wide variety of Microsoft Dynamics products. Whether you are aware of this or not, Microsoft does listen to its customers and partners and has implemented many of the requests.

Here’s how it works:

- 1) Go to <https://experience.dynamics.com/ideas/> and sign in with your Microsoft credentials.
- 2) Select the Product you are interested in.
- 3) Search for your idea to see if someone else has submitted it. If so, vote for it! Your votes count.
- 4) If no one has submitted your idea in the past, click “Suggest a new Idea” and fill out the form.

You can periodically check the site to see the status of your idea by clicking “My Ideas” under Quick Links on the right side of the page.

This is a great way to enhance your Business Central solution without having to spend dollars extending your existing solution.
